

# KONIVER WELLNESS

## TRAINING NETWORK

Thanks for taking some time to talk about the NAD, FastVitaminIV® and other injectable protocols. As we discussed, we have updated the protocols to include the patent-pending FastVitaminIV® compositions that are pushed at the end of each NAD treatment which we now call the Brain Refuel Therapy™.

We have several different protocols for:

- Chemical Detox/Addiction
- ADD/ Executive Functioning
- Mood issues: PTSD/ Anxiety/Depression
- Dementia and other Neurological Degenerative Disorders
- Concussions/Traumatic Brain Injuries
- Sports Performance

The combination of the NAD + the FastVitaminIV® compositions is a powerful and efficient way to help so many people!

As discussed, we like to formally train each doctor involved in the Brain Refuel™ Therapy so that we can all be talking the same language and helping each other gather data, etc.

Here is what the training involves:

--A full day of training about proprietary NAD/FastVitaminIV® compositions and all the other IV protocols you could ever want.

We will review everything about what is in the IVs, why are IVs useful, how to administer the IVs, etc.

— We will review everything related to the FastVitaminIV® compositions, including how to use them in your practice

— We will review everything related to injectable hormones, peptides and HCG.

— We will review stem cells, exosomes and other regenerative medicine technologies

--All of your staff would get to experience the IVs as part of the training. The Brain Refuel™ Program IVs generally retails for \$600-1200 per treatment.

--We will provide your staff all of the scripts they need to talk to patients...how to market and sell these IVs...this is critical for getting your IV practice going with new offerings.

--We will spend time talking about your patients and how to make the IVs applicable to them

--Each of the participants will receive our training manual as a hard copy. That manual includes a plethora of information about nutrients, vitamins, hormones, PEDs, etc

— We will review other cutting-edge injectable therapies including peptide therapies and protocols including the use of our intranasal hormonal delivery systems with which we are having GREAT success!

FYI - The last doctor to come train with us a couple of weeks ago is now selling about 20-25 IVs per week since she left here. So, you can likely make your training money back within a few weeks with just a few patients.

The cost of the training is \$6500.

To give you a better idea of the costs:

— Each NAD/FastVitaminIV® treatment costs \$250. When you add in supplies and nursing, we estimate no more than \$300 per one treatment.

— Many clinics charge \$800-\$1200 for one treatment (most profit about \$400-\$800 per treatment)

— Our combination NAD/Stem Cell program retails for \$10-\$22K and is the most comprehensive 3 day program available

Once finished with training, you will become a part of our network and then we will help you market the IVs to your patients and prospective clients.

We don't stop with the training. This is just the beginning to our working relationship!
